Title: VOLTAGE AND TEMPERATURE COMPENSATED PULSE GENERATOR		

Mail Stop: Patent Application
Commissioner for Patents
P. O. Box 1450
Alexandria, VA 22313-1450

The parent of the above-identified patent application, i.e., U.S. Patent Application Serial No. 10/032,277, was subjected to a Restriction Requirement by Examiner Anh Phung in Paper No. 6 of the parent application mailed February 21, 2003. Claim 1 of the present divisional application corresponds to unelected claim 22. Claim 19 of the present divisional application corresponds to unelected claim 39. Applicant contends that unelected claim 22 is generic to new independent claim 12 and unelected claim 39 is generic to new independent claim 30.

Applicant contends that remaining new claims depend from claims 1, 12, 19 and 30 of the present divisional application and thus comport with the definition of the unelected group of claims. Applicant further contends that all claims find support in the original priority document as filed. Applicant thus contends that the present claims do not constitute new matter.

Respectfully submitted,

Date: 18 Aug 03

Thomas W. Leffert
